

Program Outcome

Department of Economics

The Department of Economics has been introduced in G.L.Choudhury since the establishment of the college, i.e in the year 1990. At present the Department of Economics is imparting knowledge on two courses viz. Honours Course and Regular Course. We follow the syllabus prepared by GAUHATI University for both the courses. Both the courses aim to expose the students to the basic principles of economics and make them learn how to apply mathematical techniques to economic theory in general. These programs help the students for their academic achievement in different levels of examinations and develop the right attitude towards sustainable and inclusive development among the students of the department.
